

Environmental Policy

Armstrong Floor Products – Residential

Armstrong Floor Products recognises the importance of protecting the environment and using resources intelligently. We are committed to exercising environmental stewardship in our dealings with customers, employees, government, and community neighbours and for the benefit of future generations.

Our overall goal is to make sure that our activities are in harmony with the natural world around us.

The Armstrong Floor Products policy on the environment embodies these aims:

- To exercise care in the selection, use and conservation of energy and raw materials, especially natural resources, to assure that we are not wasting such resources.
- To make use of research and production technology to provide for the protection of our environment in workplaces and communities and to seek to reduce risk to the earth, its waters and atmosphere.
- To be prepared for emergencies and to act promptly and responsibly to protect people and the environment should accidents occur.
- To prevent pollution at the sources, to reduce waste, to make use of recycling in all our operations, and to take care that we dispose of unneeded materials in an environmentally appropriate manner.
- To comply with all applicable environmental laws and regulations.
- To integrate environmental considerations in all our activities and continually improve environmental performance by formulating communicating and monitoring our environmental targets.

Management makes sure adequate funds and training are available to reach these goals.

The effectiveness of overall environmental performance will be evaluated twice a year in the management review.
